

# Biosimilars are proven to be safe and effective.

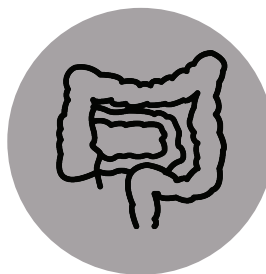

Biosimilars effectively treat diseases like:

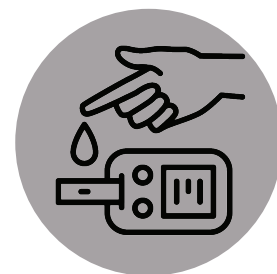

Rheumatoid Arthritis

Cancer

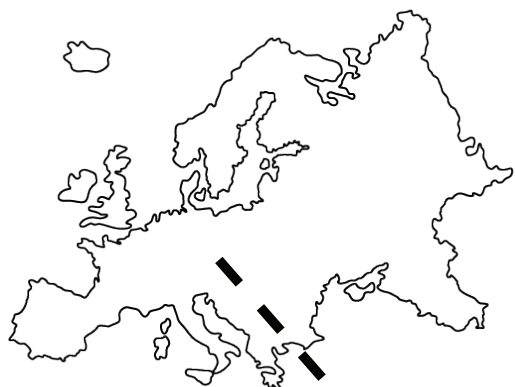

Crohn's

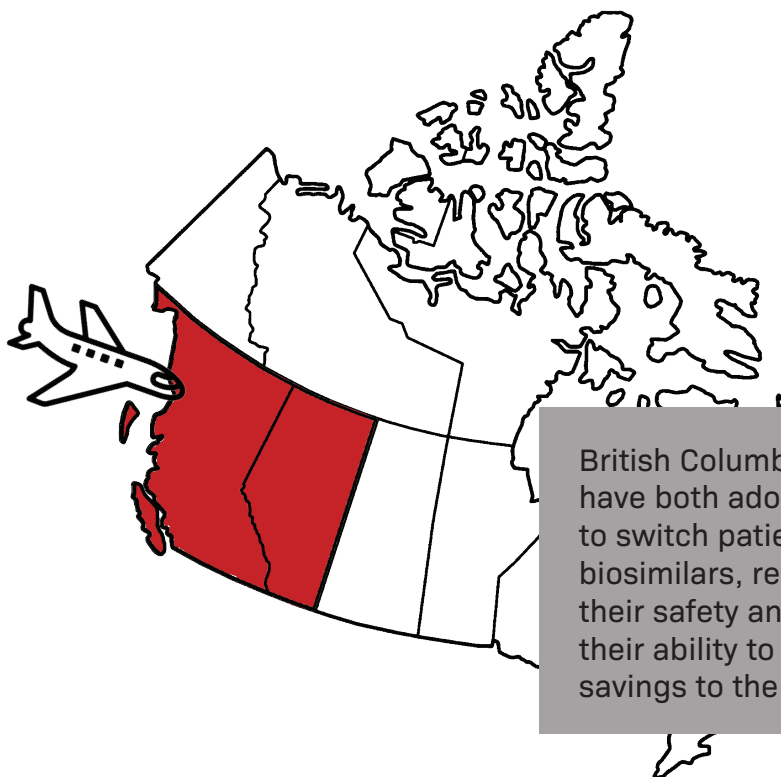

Diabetes

## HOWEVER, UPTAKE HAS BEEN SLOW

Building on 10 years of patient experience in Europe

Over the last 10 years, the EU monitoring system for safety concerns has not identified any relevant difference in the nature, severity or frequency of adverse effects between biosimilars and their reference medicines.<sup>1</sup>

Alberta and B.C.  
have been safely  
benefiting from  
the use of biosimilars.

British Columbia and Alberta  
have both adopted policies  
to switch patients to  
biosimilars, recognizing  
their safety and efficacy and  
their ability to provide  
savings to the health system.
